

Industrial Fire & Life Safety

IFP is a team of mission critical fire protection specialists.

About us:

Industrial Fire Protection (IFP) is a global fire suppression system contractor and product developer. We are also an exclusive integrator for Sevo Systems.

Design

Our team has **NICET** certified, **NFPA 2001** versed fire protection engineers, system designers and technicians.

Install

We aim to provide **industry leading** project management, supply and installation services.

Maintain

With a nationwide network of fire protection specialists, we not only provide the systems, **we inspect them too.**

IFP Is leading the way for **sustainable** fire protection.

How?

IFP's clean agent technology reduces greenhouse gas emissions by utilizing clean agent 3M™ NOVEC™ 1230. NOVEC™ 1230 has zero ozone-depletion potential, a global warming potential value of less than 1 and an atmospheric lifetime of less than three days. 3M™ NOVEC™ 1230 far exceeds alternatives.

Properties	NOVEC 1230	Halon 1211	Halon 1301	HFC-125	HFC-227ea
Ozone depletion potential (ODP) ¹	0.0	4.0	12.0	0.0	0.0
Global warming potential - IPCC ²	<1	1750	6290	3170	3350
Atmospheric lifetime (Years)	0.019	16	65	28.2	38.9
SNAP (Yes/No)	Yes	N/A	N/A	No	No

¹World Meteorological Organization (WHO) 1998, Model-Derived Method.

²Intergovernmental Panel on Climate Change (IPCC) 2013 Method, 100 Year ITH.

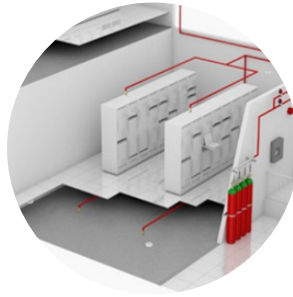

3M™ NOVEC™ 1230 is a liquid when stored, and a gas when discharged. NOVEC™ 1230 works by absorbing heat energy. NOVEC™ 1230 is **NOT electrically conductive**, leaves **no residue** and requires **no cleanup**. This most importantly results in **No Downtime**.

Clean energy meets sustainable fire protection.

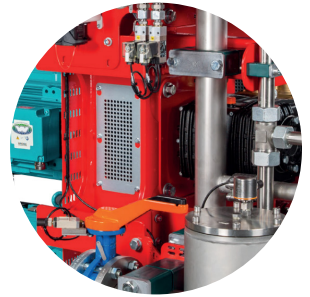

What solutions do we offer?

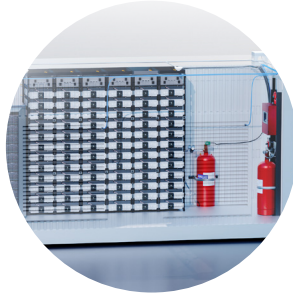

**Clean Agent
Systems**

**Inert Gas
Systems**

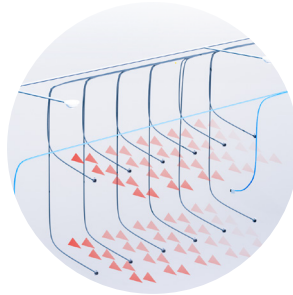

**Water Mist
Systems**

**Direct Injection
Systems**

**Detection &
Control**

**Off-Gas
Detection**
